HOW TO measure

STEP 1

choose your favourite fitting shirt and grab a tape measure or ruler.

TIP: don't use a polo, tee or singlet to measure with because they stretch more than a woven shirt does.

STEP 2

lay it down on a flat surface with the arms extended and smooth it flat.

TIP: make sure no-one is wearing it.

step 3

measure down 2.5cm from where the arm is sewn onto the body, give yourself a 'mark'.

TIP: don't use a pen or marker, just make a light indentation in the fabric with your fingernail.

step 4

half chest measurement

Use this 'mark' you've just made and then measure across the front of the shirt from seam to seam.

TIP: only measure the front, that's why it's called a half chest measurement.

step 5

refer to sizing tables in this catalogue or Online www.aussiepacific.com.au to match your half chest measurement to the Sizing Table.

TIP: do the measure up more than once in case you misread the numbers.

step 6

compare and consider

If your half chest measurement is 59cm then go to the shirt style you are considering and determine where 59 sits on the size chart.

TIP: If you come in at 59cm, then consider going to an L at 60.5cm

VARIATIONS +/- 1 cm - 1/2 CHEST MEASURE
